ERRATA

FLOCH & GÉLARD, this *Bulletin*, 1955, v. 52, 787, " DDS " in the last sentence should read " the diethyl derivative".

In the Summary of Recent Abstracts, this *Bulletin*, 1955, v. 52, 323, the comment is made that the dose of paris green used by ARAGÃO for the destruction of Bromeliads (2·5 gm. per square metre) was high. Dr. Aragão writes to say that this dose is not high, in comparison with doses of copper sulphate used in similar work, which are very variable, depending on the type of forest treated.

In the paper by CAVIER & GAULIN, abstracted in this *Bulletin*, 1956, v. 53, 354, the substance used for treatment of enterobiasis is referred to throughout as dilaurate of diethyl-diamine; another (and more commonly recognized) name for this compound is piperazine dilaurate.

WALTON, this *Bulletin*, 1956, v. 53, 449, line 11, the words " 8 square miles " should read " 80 square miles".
